

Sarvarbek Vakhobov

Entry level web developer

I love coding, designing website and analyzing any data. They have already become a big part of my life. I browse the internet for learning new skills and beauty codes, websites. Although, I'm a lazy person, I always try to be active during any work, even without sleeping. I don't like to say "I don't know", so I always try to know, find and even learn from someone.

GOALS FOR THE FUTURE

Data Science

Data science is an essential part of many industries today, given the massive amounts of data that are produced, and is one of the most debated topics in IT circles.

Artificial Intelligence

Artificial Intelligence or AI provides a computer program the ability to think and learn on its own. It is a simulation of human intelligence (hence, artificial) into machines to do things that we would normally rely on humans
